Fibrous product confg. detergent for washing the body - comprises
paste of detergent, thickener, alcohol and opt. perfume etc.,
printed on fabric
C90-159490

A fibrous product with a body shampoo is obtained by a method in
which an aqueous printing paste composed of a detergent for body
shampoo, e.g., lauryl ether-sodium sulfate, etc., a glue such as CMC,
sodium alginate, etc., and a volatile alcohol such as ethyl alcohol,
together with a perfume, a pigment, etc., as needed, is printed in a
pattern on the surface of a fibrous product, e.g., woven or nonwoven
or knitted fabrics of natural or synthetic fibres, etc., and dried.

The aqueous printing paste is composed of e.g. 300 pts.wt. 20%
lauryl ether sodium sulfate, 100 pts.wt. 4% P.O.E. eleyl ether (17
moles EO added), 500 pts.wt. 1% CMC, 90 pts.wt. water, and 10
pts.wt. ethyl alcohol.

USE/ADVANTAGE - The fibrous product containing body
shampoo is excellent in appearance and texture and can effectively
and simply wash human body only by wetting it with water. (3pp
